Brinter
Company Overview

Modular bioprinting platform enabling multi-material tissue engineering for research, clinical, and pharmaceutical applications

Company Overview

- Founded in 2020 and headquartered in Turku, Finland, Brinter is a modular 3D bioprinting startup developing scalable solutions for personalized healthcare and regenerative medicine
- Offers scalable bioprinting solutions for tissue engineering, drug development, and clinical applications, enabling multi-material printing with plug-and-play automation
- Serves hospitals, research institutions, and pharmaceutical companies across Europe, North America, and Asia, with growing adoption in clinical and translational research settings
- Proprietary technology includes modular bioprinters, bioinks, and software tools for precision tissue fabrication and cell viability optimization

Brinter
Company Overview

Modular bioprinting platform enabling multi-material tissue engineering for research, clinical, and pharmaceutical applications

Product Overview

Brinter ONE

- Multi-material printing
- Modular design
- Automation
- Calibration system

Software

- Browser-based UI
- Integrated slicer
- Customizable parameters

Printing Technologies

- Pneumatic extrusion (Pneuma Tools)
- Screw-driven mechanical extrusion (Rotary & Visco Tools)
- Electromagnetic droplet dispensing (Droplet Tool)
- Thermoplastic granulate extrusion (Granu Tool)

Corporate Timeline

2018 *Founded as a spin-off from 3DTech Ltd*

2020 *Brinter founded*

Jun 2021 *Seed Round*

2023 *Began beta testing of bioprinted implants*

2024 *Finalized pre-clinical trials for rotator cuff repair implant*

2026 *Implant product expected to launch*

Key Management

Tom Alapaattikoski
CEO & Co-Founder

- Finnish-American serial entrepreneur and biotech trailblazer experienced in industry-changing companies and hiring high-performance teams

Dr. Matthew Brovold
Head of Science

- Translational scientist passionate in paving the path for medical innovation

Tomi Kalpio
Head of Manufacturing

- Finnish manufacturing engineer, the mastermind behind the Brinter's Additive Manufacturing technology innovations

Selected Partners

WILSON SONSINI

THE FDA GROUP LLC

MTEC Medical Technology Enterprise Consortium

North Carolina Biotechnology Center

BakerHostetler

Bio Biotechnology Innovation Organization

AdvaMed Advanced Medical Technology Association

WFIRM Wake Forest Institute for Regenerative Medicine
