Solana
Company Overview

Next-generation blockchain network delivering speed, security, and decentralized application support

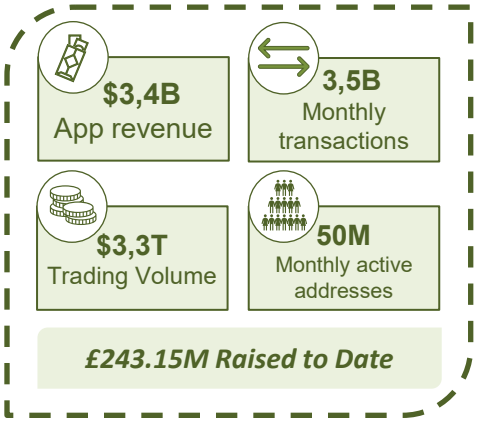

Company Overview

- Founded in 2017, Solana is a high-performance Layer-1 blockchain enabling fast, low-cost decentralized applications and financial services
- Designed for scalability, leveraging a unique Proof-of-History (PoH) + Proof-of-Stake (PoS) architecture to process thousands of transactions per second
- Supports a wide range of use cases including DeFi, payments, NFTs, gaming, and consumer fintech applications
- Known for low transaction fees and high throughput, positioning it as a key infrastructure layer for next-generation financial services
- Large and growing ecosystem of developers, protocols, and users, with strong adoption across Web3 and fintech innovation
