Tenderly
Company Overview

Full-stack Web3 infrastructure platform delivering smart contract simulation, testing, and observability across multichain environments

Company Overview

- Founded in 2018 and based in Belgrade, Serbia, Tenderly is a full-stack infrastructure platform built for the Web3 ecosystem
- Enables seamless smart contract development with powerful tools for simulation, debugging, transaction tracing, and automated testing
- Supports 35+ EVM-compatible networks, allowing developers to operate across chains with unified workflows and rapid deployment
- Integrates production-grade infrastructure like Tenderly RPC and Virtual TestNets, helping teams monitor, diagnose, and optimize decentralized applications in real time

KPI's

73 Employees	**500%** YoY revenue growth	**+25M** Daily VM transactions
420% YoY user growth	**+50K** Developers	**20%** Usage growth

Key Financials

Notable Funding Rounds:

- Series B: $40M in March 2022.
- Series A: $15.3M in July 2021.
- Seed Rounds: $3.3M in January 2021.

$26.5M

Tenderly
Company Overview

Full-stack Web3 infrastructure platform delivering smart contract simulation, testing, and observability across multichain environments

Product Overview

Core Capabilities	Smart Contract Simulation, Debugger & Gas Profiler, Monitoring & Alerts and Contract Verification
Virtual TestNets	Fully controlled replicas of mainnet environments for collaborative development and staging
Developer Tooling	Simulation API, Forks & Sandboxes and Web3 Actions
Infrastructure Layer	Node RPC, Trace & Simulate RPC and Request Batching
Observability & Analytics	Developer Explorer, Asset & State Changes and Alert Destinations

Corporate Timeline
